Peanut Butter Jelly Time \$PBJ

White Paper

Thank you so much for your support!

Introduction

The Peanut Butter Jelly Time Token (PBJ) is a meme-based cryptocurrency that is based on the popular "peanut butter jelly time" banana meme. PBJ was created by a team of experienced software engineers, artificial intelligence experts, business development executives, entrepreneurs and cryptocurrency enthusiasts.

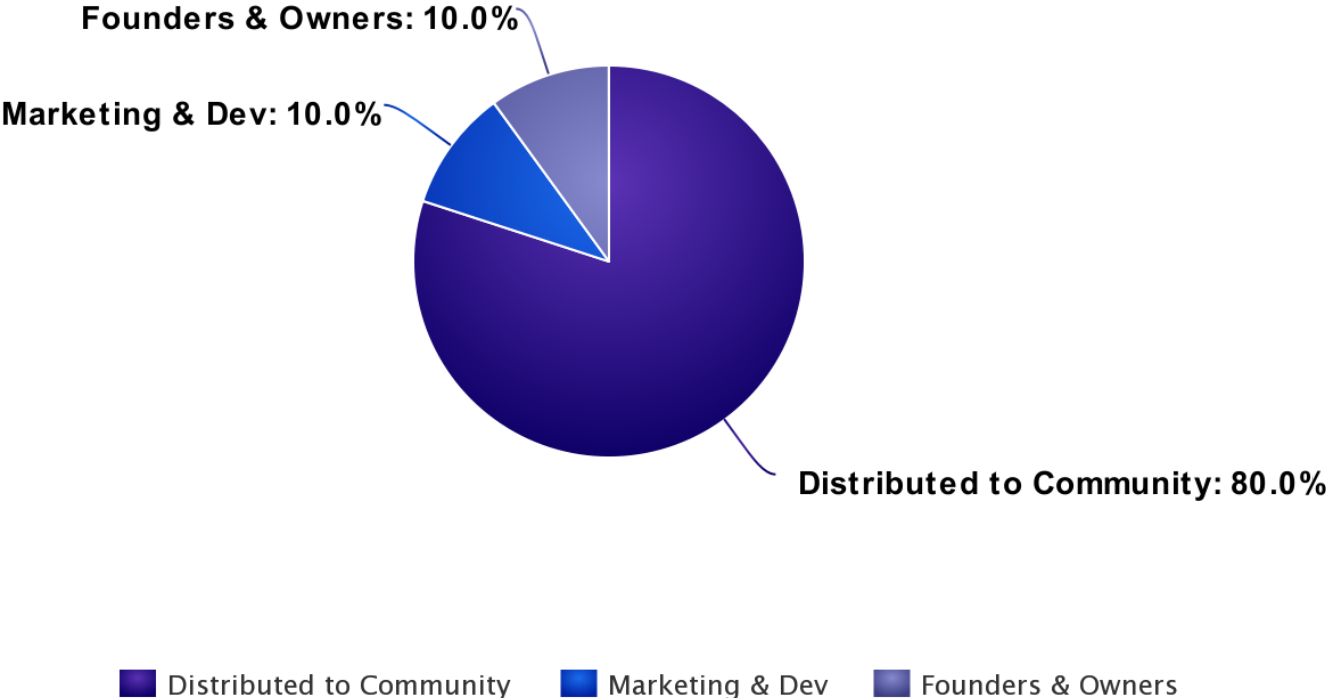

PBJ is designed to be a fun and engaging way to use cryptocurrency. PBJ can also be used to participate in our community contests and giveaways.

We believe that PBJ has the potential to be a successful cryptocurrency because it is based on a popular meme that is known and loved by people all over the world. We are also developing a generative AI platform for crypto research, which will allow users to generate new memes and other content based on existing memes.

We believe that PBJ is a unique and innovative cryptocurrency that has the potential to change the way people interact with memes. We are excited to bring this project to life and we hope that you will join us on our journey.

Tokenomics

PBJ is a deflationary token with a total supply of 100 billion tokens. 80% of the tokens will be distributed to the public, 10% will be used for marketing and development, and 10% will be reserved for the founders.

- Public Pool: The public pool is a way to distribute tokens to the public. This can be done through airdrops, giveaways, or contests. It's a great way to get the word out about our project and attract new users. We have allocated 80% of the tokens to the public pool. This will include: airdrops, contests, and giveaways which are great ways to reward our community and attract new users.

-
- Marketing and Development: Marketing development is essential for the success of any project. We have allocated 10% of the tokens to marketing and development. This will allow us to reach a wider audience and generate awareness for our project.
 - Founder Tokens: Founder tokens are a way to compensate the founders of the project for their time and effort. We have allocated 10% of the tokens to founder tokens.

We believe that this allocation of tokens is the best way to ensure the success of our project. We have considered all of the factors involved and we believe that this allocation is the most likely to achieve our goals.

We hope that you will consider investing in our project. We believe that we have a great team, a great product, and a great future. We would be honored to have you as a part of our community.

Taxes

Here are some reasons why these taxes are important to the development of the token:

- Funding: The taxes can be used to fund the development of the project, such as marketing, research and development, and community building. This is important because it ensures that the project has the resources it needs to succeed.
- Incentive: The taxes can be used to incentivize people to use the token. For example, the transaction tax can be used to reward stakers for their participation in the network. This helps to create a more stable and secure network.
- Deflation: The burn tax can be used to reduce the supply of tokens. This can help to increase the value of the remaining tokens.

Conceptual Roadmap:

Q2-23: Token launch and social establishment

Q3-23: Exchange listings

Q4-23: Meme remix/market platform concept

Founders:

We understand that you may be concerned about our decision to remain anonymous. We want to assure you that we have a strong team with deep experience in software engineering, entrepreneurship, business development, marketing, artificial intelligence, and cryptocurrency.

We have all worked at multiple Fortune 500 companies, where we have developed and delivered software solutions that have generated millions of dollars in revenue. We also own an

artificial intelligence and automation consultancy, where we help businesses to automate their processes and improve their efficiency.

In addition, we have a deep understanding of cryptocurrency. We have advised multiple crypto ventures and we are original investors in Bitcoin. We believe that cryptocurrency has the potential to revolutionize the way we interact with money and we are excited to be a part of this revolution.

We understand that some investors may be hesitant to invest in a project where the founders are anonymous. However, we believe that our experience and expertise speak for themselves. We are confident that we can build a successful project and we hope that you will consider investing in us and being part of our growing community!

Conclusion

We believe that PBJ has the potential to be a successful cryptocurrency. It is based on a popular meme that is known and loved by people all over the world. We believe that PBJ is a unique and innovative cryptocurrency that has the potential to change the way people interact with memes. We are excited to bring this project to life and we hope that you will join us on our journey.
